

4A FORA 100Base-TX / 100Base-FX Media Converters FMC-10X MINI Series

IMAGE

DESCRIPTION

4A FORA FMC-10X MINI Series Fast Ethernet CAT 5 to optical Media Converters accepts standard 100 Mbps Fast Ethernet traffic from 100 Base-TX source over CAT 5 connected via a standard RJ45 jack. Ethernet traffic is fed to a 100 Base-FX compatible PHY IC to Fast Ethernet fiber optic transceiver (Tx + Rx) with SC/UPC optical connector.

Auto-MDIX, a standard feature on the PHY IC used in this media converter, automatically corrects for cable cross-over. The PHY provides the optimum data handling conditions for streaming video with excellent quality of service (QoS). This link is particularly suitable for applications such as IPTV delivered over a SMF physical layer.

The media converter may be used wherever it is required to convert Fast Ethernet traffic from copper cables to an optical cable. A pair of media converters may be used to form an optical “bridge” between two copper based networks. A single media converter may be used to link a unit already equipped for Single Mode Fiber into a copper cable based network.

■ FEATURES

- Converts Ethernet over copper to Ethernet over SMF
- 100 Mbps data (125 MBd) throughput sends
